Telescopic Mast \ Replacement T-Nuts and Thumb Screws

Our masts have stood the test of time and been in service form much more then 25 years. The construction allows water to pass between the tubes and prevent a corrosion of binding problem and as such tend to be in service far longer than other styles of mast. For this reason we have this Repair Kit to replace worn or damaged or corroded T-Nuts and Thumb Screws and quickly bring an old mast back to an as new working condition in only a matter of minutes. Or you can simply upgrade to our larger Thumb Screws for there ease of use.
